

Bay Business Group

The Bay Business Group is an accounting outsourcing organization. From a review of their website, it appears that the Bay Business Group offers several services. Monthly bookkeeping is an obvious service for an accounting outsource team. They also offer full outsourced accounting. This is more than just bookkeeping. Here they do everything an accounting team would do. Another obvious is tax preparation and planning. This is a business function that nobody loves to do in-house. Finally, they offer other services such as Quickbooks set up, DCAA and payroll. For more you can see their website.
