

## A Hanahan Dentist Will Return the Sparkle to Your Smile

Patients always come first with Hanahan dentists. The latest in dental equipment and procedures and extraordinary customer service place your continued oral health and comfort at center stage with Hanahan dentists and their staff. Moreover, your Hanahan dentist offers same day emergency appointments for those times when you cannot wait until the next opening.

Of course, preventative care takes center stage with your Hanahan dentist. You and your family are welcome to come in for routine examinations and cleanings and, if needed, fluoride treatments and sealants. Your dentist or dental assistant may also take digital xrays (which limit radiation exposure) or use infrared Diagnodent (a cavity detection method) to check your teeth for little problems before they become big ones. Hanahan dentists also place high importance on patient education. Good dental habits begin at a young age; your Hanahan dentist and staff are always happy to take the time to demonstrate proper brushing and flossing techniques to your little ones. You also have the benefit of the most current dental technology that will provide you with the best possible dental care in the shortest amount of time and with as little stress and pain as possible. Nitrous gas is available for those patients who experience anxiety during office visits and procedures.

Sometimes problems do occur despite the most careful dental care. When that happens, your Hanahan dentist can provide you with the restorative or cosmetic services that you need to return your smile to its former glow. Some of the restorative services your Hanahan dentist offers are extractions, tooth colored cavity fillings, both full and partial dentures, implants and implant restorations, crowns and bridges. Your crown can even be fitted and inserted within the space of a day with one visit crown technology. Available cosmetic services include tooth whitening and tooth colored crowns, veneers and dental bonding. Hanahan dentists never underestimate the importance of a good smile. More serious dental problems can be corrected with procedures such as gingivectomies, root canal treatments and scaling and root planing.

Dentistry is constantly evolving, of course, just like any other medical discipline. Hanahan dentists and their staff members continually keep up with the latest technology and procedures by regularly attending lectures, workshops and conventions.

You and your family can be assured of the best possible care by entrusting your dental health to a Hanahan dentist.
